SpearMail 6.0 Migration Guide

This will help you to migrate SpearMail 5.3 to SpearMail 6.0.

1. Install SpearMail 6.0 as per Installation Guide
2. Ask all users to download the mails from current SpearMail version.
3. Shutdown SpearMail ver. 5.3
4. Copy maildata folder from C:\Program Files\SpearMail directory to another machine or another drive, for safer side
5. Now run migrate.exe from Utility folder of CD

Check the Installation path of the both versions

6. Click on Migrate, there it will show tick mark against each process.
7. Now remove Ver 5.3 from startup and remove link from program files. (Do not uninstall version 5.3 keep it for some days)
8. Now Start SpearMail 6.0
